Total No. of Questions : 09

B.Tech. (CE) (Sem.–6)

ENGINEERING ECONOMICS ESTIMATION AND COSTING

Subject Code : BTCE-601-18

M.Code : 79393

Date of Examination : 12-12-2022

Time : 3 Hrs. **Max. Marks : 60**

INSTRUCTIONS TO CANDIDATES :

1. **SECTION-A is COMPULSORY consisting of TEN questions carrying TWO marks each.**
2. **SECTION-B contains FIVE questions carrying FIVE marks each and students have to attempt any FOUR questions.**
3. **SECTION-C contains THREE questions carrying TEN marks each and students have to attempt any TWO questions.**

SECTION-A

1. Write briefly :

a) Write any four objectives of Rate analysis

b) Write a short note on Approximate estimate

c) Define depreciation what are the various methods used in depreciation calculation

d) Give a short note on sunken cost

e) Differentiate between macroeconomic and microeconomic

f) What are the duties of quantity surveyor?

g) Discuss various methods used to compare GDP of different countries

h) Explain various determinants of supply

i) What are the various representative factors for investment analysis?

j) What is product life cycle?

exams preparatory

SECTION-B

2. Analyse the rate for construction of random rubble stone masonry in foundation and plinth in cement mortar 1:6. Unit 1 m^3

3. What is contract explain various types of contracts.

4. What do you meant by out-turn work with suitable example, explain approximate quantity of different work done by an average artisan per day.

5. Define the term cost. What are various types of cost?

6. A R.C.C beam 400 mm × 800 mm and length 5200 mm is reinforced with 5 no. 20 mm diameter of M.S. bars placed in one row. Three main bars are bent-up. Two i.e., anchor bars of 10 mm diameter are provided at the top. 6 mm diameter stirrups are provided at 200 c/c. The all-round clear cover is 40 mm. Find out the total quantity of steel (plain) bars. Prepare the table of bar bending schedule.

SECTION-C

7. Estimate the cost of earthwork for a portion of a road for 400 meters length from the following data:

Station	Distance in metre	R.L of Ground
25	1000	51.00
26	1040	50.90
27	1080	50.50
28	1120	50.80
29	1160	50.60
30	1200	50.70
31	1240	51.20
32	1280	51.40
33	1320	51.30
34	1360	51.00
35	1400	50.60

R.L of formation at 25th station is 52.00. Downward gradient of 1 in 200 is provided throughout the section. Draw longitudinal section of the road. Formation width of the road in 10 meters. Side slopes are 2:1 in banking and 1.5:1 in cutting.

8. Discuss in detail

a) Workman's compensation act

b) Minimum wage act.

c) Easement Rights.

9. Estimate the quantities of the following items of a residential building from the given drawing in Figure 1

a) Lime concrete in foundation

b) First class brickwork in 1:5 cement sand mortar in foundation and plinth

c) 2.5 cm Damp proof course

d) First class brickwork in lime mortar in superstructure Doors:

Dl - 120 cm ×210 cm

D2 - 100 cm ×200 cm

D3 - 75 cm ×180 cm

Windows:

Wl - 100cm×150 cm

W2 - 100 cm×200 cm

W3 - 75cm×120 cm

C.W - 75×60 cm
